

CPS - L AND U WITH QUICK RELEASE AND VECTOR PORT CERTIFIED FULL TRASH CAPTURE DEVICE BY CA STATE WATER BOARD

With over **25 years of experience**, Fabco Industries continues to offer and expand upon their comprehensive line of versatile solutions to include an array of **CA SWRCB approved devices**, including the Connector Pipe Screen in both "L" and "U" configurations. **Available for 12, 18, 24, 36 inch pipes and larger custom sizes.**

The quick release mechanism allows for **easy install and removal for maintenance without the need for confined space entry.**

CPS U Configuration

CPS L Configuration

A Connector Pipe Screen (CPS) is a catch basin insert trash capture filter device. Unlike other catch basin inserts that are typically installed closer to the inlet (under the drain grate or below the curb opening), CPS inserts are installed in front of the catch basin's outlet pipe – **trapping trash and debris inside the catch basin while allowing filtered stormwater to exit into the storm drain infrastructure.**

The CPS is designed to cover a specific pipe diameter – its size does not depend on the size of the catch basin drain. The CPS is a **compact, affordable product that is easy to install and adaptable over a wide range of catch basin sizes and styles.** The design utilizes very little space, maximizes the trash storage capacity within the catch basin and allows for easy maintenance.
